

## ONYX

filter coffee machine

The Onyx is a great option for busy people in environments such as meeting rooms or breakout areas where several hot drinks may be required at the same time.

You will be pleased to hear that messy filter papers and luke warm coffee are a thing of the past with our innovative filter system. The ground coffee pouches are vacuum packed for extra freshness and they are incredibly easy to use to brew a standard pot or thermos of fresh coffee just when you need it. The water unlocks the sealed pouch releasing the delicious coffee brewing inside. The result is the freshest filter with that wonderful just brewed taste and aroma that we all love to kick start the day

Ready to go in just seconds, your first cup of the day is just moments away. Don't worry if the meeting overruns because everything is kept warm until the coffee is needed.

Ideal for daily or intermittent use, every office needs one of these!

ITEM	SPECIFICATION
Height (mm):	290
Width (mm):	220
Depth (mm):	332
Weight (kg):	29
